

On letter dated March 30, 2008, Mr. Burhop from the IMCC indicated the existence of a website urging individuals to communicate with the FCC in opposition of bulk billing contracts.

As an affected customer locked into a 75 year contract, [www.banbulkbilling.com](http://www.banbulkbilling.com) is an informal forum for consumers affected by any type of exclusive bulk billing. This website doesn't urges individuals to communicate with the FCC in opposition of bulk billing contracts, but rather provide information on how to file and review comments in the FCC Docket 07-51.

As to who organize/pay the site, customers from the cable industry did. I also want to bring to the FCC attention that IMCC has a site that promotes exclusive contracts between PCO's and MDU's .

IMCC should be proud to be part of an industry, whose customer's had to create a web site to share information, and vent about abuses consistently inflicted upon them.
